

Electric Transportation Make Ready Program

Making electric charging systems affordable for Georgia businesses

Georgia is already the sixth largest market in the nation for EV charging, and more drivers and companies are turning to electric transportation for lower ownership costs and cleaner energy choices. Georgia Power's Make Ready Program prepares your business to meet the growing demands of EV charging.

Our Make Ready Program is designed to remove the biggest financial hurdle of installing electric chargers at your location by installing, owning and maintaining the charging infrastructure behind your meter that serves the charger. By eliminating your upfront costs for infrastructure, you can focus on the charging system that works best for your business. We can also help you choose the right charging equipment that fits your needs.

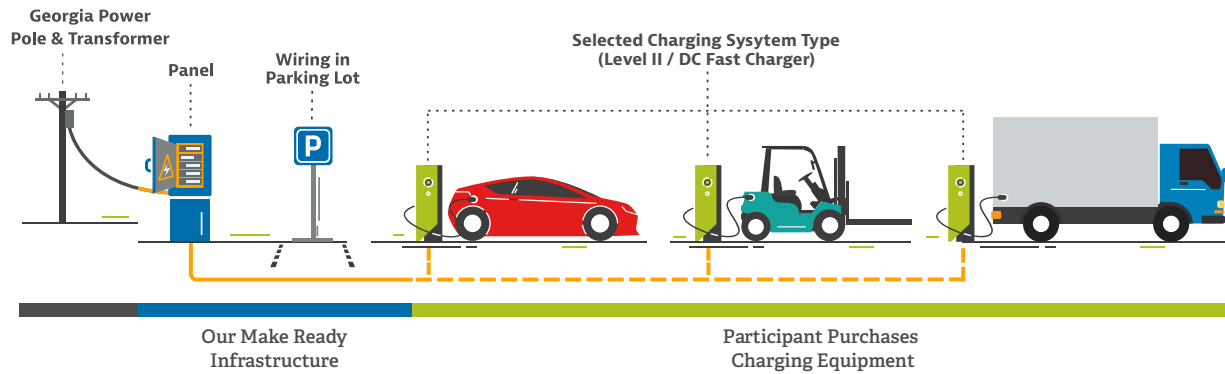

Now is the perfect time to prepare for the growing EV market

The future of electric transportation is growing rapidly as many automakers expand their electric vehicle models. Total cost of ownership for an EV is often less than a gasoline-powered vehicle, and consumers are buying more of these vehicles as the economical choice. Prepare your location for onsite charging systems and reap the benefits including:

- ▶ *Modernizing and preparing your business to support a growing market segment of fleet and passenger vehicles*
- ▶ *Supporting the sustainability values of your customers, tenants and employees*
- ▶ *Helping your company achieve its clean energy goals through decarbonization*
- ▶ *Demonstrating community leadership and innovation*

Georgia Power Make Ready Program Infrastructure

Eligible Program Technologies

A variety of electric technologies qualify for the Make Ready Program, including:

- ▶ Passenger vehicles
- ▶ Transit and school buses
- ▶ Refrigerated container racks
- ▶ Short-haul and long-haul delivery
- ▶ Short-haul heavy duty
- ▶ Yard or jockey truck
- ▶ Airport: Planes/ground support equipment
- ▶ Forklifts
- ▶ eTru (truck refrigeration)

Are you looking to electrify your current fleet?

Electrifying your fleet has many advantages to your business. We will partner with you to develop a plan for your fleet conversion and help identify the charging system needed to support the transition to electric of your passenger vehicles, delivery trucks, forklifts or service equipment. There are many benefits to fleet conversion:

- ▶ Significant reduction in fuel and maintenance costs
- ▶ Operational efficiency including reduced downtime and labor cost-savings
- ▶ Electric vehicles can last longer than non-electric vehicles
- ▶ Helping your company reach its sustainability goals

How do I apply for the Make Ready Program?

It's easy to get started! First, submit your application, and we will review your information based on location, technology, size, scope, power availability and deadline. Once a project is approved, we will perform a site review, develop a project plan, finalize the agreement and build the system. **Make Ready Program funding is scheduled to be available through December 31, 2022.** Learn more about the program at georgiapower.com/makeready.

We are proud to partner with our business customers to ensure that charging infrastructure meets the state's needs and increases electric transportation technological advances.
